WORKER HEALTH AND SAFETY POLICY

Creating occupational health and safety management systems in accordance with ISO 45001 standards in accordance with the laws, regulations and regulations regarding occupational safety and keeping them up-to-date with continuous improvement, It considers the protection of the occupational health and safety of its employees without exception and the continuous improvement of the working environment among its main objectives, while carrying out its activities at the highest quality level, especially in the field of chemical production. In this context, we undertake to provide and maintain the following issues.

Establishing and maintaining appropriate emergency, (earthquake, fire, flood, virus outbreak, civil defense, etc.) action procedures and business continuity opportunities according to risks and taking necessary measures to reduce emergency risks,

To comply with the applicable legal regulations and administrative regulations regarding OHS,

To provide trainings to all employees in order to ensure that they are aware of their individual OHS responsibilities,

To provide the necessary training support within the scope of our personnel's responsibilities,

By continuing to work in all processes in ISG activities, it will make continuous improvements, thus minimizing the dangers.
